

Recording assets on the go securely and cost-effectively with the TESMA[®] App

- CHG-MERIDIAN further develops TESMA[®] with the launch of the TESMA[®] App
- Eliminate manual processes, and reduce the time and effort spent on asset management by using a smartphone
- A further step towards the complete digitalisation of asset lifecycles

Egham, July 5th, 2018

The TESMA[®] App from CHG-MERIDIAN brings asset tracking to your smartphone making it easy to record the serial numbers, statuses, and specific information of any asset. This helps to reduce the time and money spent on administration – from receiving the goods right through to the end of the lifecycle. The app is available for Android and iOS operating systems.

CHG-MERIDIAN's TESMA[®] App is driving forward the digitalisation of asset management along the entire lifecycle. The app makes it easy to record the serial numbers of IT assets such as printers, smartphones, laptops, and equipment used in healthcare and industrial engineering by using the smartphone camera or a handheld scanner.

When the assets are received, the scanned serial numbers can be immediately allocated to existing orders in TESMA[®]. Other asset-specific data such as cost centres and locations can be recorded at the same time. It is also possible to change the asset status throughout an asset's lifecycle and to update any related information. The automated process makes manual entry of serial numbers and the checking off of Excel lists redundant, helping to eliminate human error and saving employee's time.

TESMA[®] brings together technical information such as: asset type, specification, location, and consumption data. Along with financial information including: leasing prices, cost centres, funding periods, and consumption costs. This helps to create maximum technical and financial transparency and makes it easier to organise assets.

Vicky Blocksidge, TESMA[®] product manager at CHG-MERIDIAN, had this to say "The TESMA[®] App is a logical addition to TESMA[®]. It makes organising assets easier for our customers and allows us to leverage the power of digitalisation to increase asset management efficiency over the entire lifecycle."

CHG-MERIDIAN will continue to focus on digitalisation in the future in addition to promoting the development of other innovations that will simplify customer processes.
