

# TESMA®: Our modules at a glance

## Transparency throughout the entire technology lifecycle

### Invoicing

- Permanent electronic access to all invoices – including PDF format
- Detailed and individual assessment of invoice data down to the asset level

### CONTRACT MANAGEMENT

- Quick access to all CHG-MERIDIAN contracts and technology portfolios
- Bi-directional maintenance of customer-specific data at the contract and unit levels, e.g. cost centre, installation and order data

### ASSET TRACKING

- Track and trace equipment movement thanks to unique tracking process – from ordering to rollback
- Structured administration of technologies by means of definable device status and workflows throughout the customer process

### E-PROCUREMENT

- Independent order platform with workflow-based ordering process for placing and following up orders
- International and central shopping cart that can be managed itself

### Own Asset

- Records and manages all assets outside CHG-MERIDIAN's existing contracts
- Device landscapes at a glance – regardless of supplier and type of financing

### REPORTING

- Dashboard allows quick access to reporting features for all interest groups
- Generates pre-defined, individual reports broken down all the way to individual cost centres

### Ticket Management

- Create trouble tickets at the touch of a button thanks to preset contract data for your service level
- Notifies external partners automatically, if desired

### End of Life

- Maps complete rollback processes in real time – covers everything through to the certified eraSURE deletion process for IT assets
- Transparent equipment tracking from pickup to erasure logs

# TESMA®: Our interfaces at a glance

## Easy connection to third-party systems

### EDIFACT

- Electronically exchange invoice data for automated processing in your ERP system

### Data Bridge

- Data between customer applications and TESMA®
- Import and export functions for interactive information exchange
- Define references and dependent reference values to increase installation data quality

### OCI Interfaces

- Interfaces for integrating existing eCommerce solutions from various suppliers into the TESMA® e-Procurement module
- Solution for global electronic procurement

### TESMA® WEB SERVICE

- Automatically exchange data and integrate TESMA® into your existing process landscapes
- Standardised, low maintenance REST interface and secure HTTPS connection and authentication routines

### ERP ORDER INTERFACE

- Interface for integrating ERP customer orders into the TESMA® e-Procurement module

### TESMA® Download Scheduler

- Automated, scheduled deployment of individual export files
- CHG-MERIDIAN provides complete process integration
- Secure HTTPS connection, authentication routines are also possible
